Summary

Full-Stack Software Developer with one year of experience building ASP.NET web applications and SQL Server databases, strong in OOP and clean code, seeking to contribute to scalable and innovative software solutions in a professional environment.

Education

Bachelor's degree in Computer Science

Umm Al-Qura University, 2021 - 2025 – Makkah.

GPA: 3.20 out of 4.

Experience

Ikram Association. – Makkah, Saudi Arabia

ASP.NET Core Web Application Full-Stack Development(24NOV 2025 – 25 MAY 2026) (Technical Development Program)

- Developed and maintained a web application currently in use at the organization for managing and archiving projects, with integrated user authentication and user management features.
- Developed and maintained a web application using ASP.NET Core MVC and C# following clean architecture principles.
- Designed and managed databases using Entity Framework (Code First) and SQL Server.
- Implemented secure authentication using ASP.NET Core Identity initially, then customized the authentication flow using the built-in PasswordHasher and session management.
- Applied Object-Oriented Programming (OOP) principles and structured the project using layered architecture.
- Built responsive user interfaces using HTML, CSS, and Bootstrap.
- Debugged, refactored, and improved code quality to ensure maintainability and scalability.

ASP.NET Core Web Application Intern and Mobile App Development (30 JUN 2024 – 8 AUG 2024)(Summer training)

- Developed a volunteer-task matching web system using ASP.NET Core and built a mobile version using Flutter, with hands-on experience in database integration and full-stack development.
- Gained practical experience in app development, connecting systems with databases, and applying technological solutions in live projects.

Projects

Project Archive & User Management System (Team Project)

A full-stack web application currently in use at the organization for managing and archiving projects, developed collaboratively with an experienced staff member. Includes project CRUD operations, tracking of ownership, and an integrated user authentication and management system.

Choozy – Mobile Application (Flutter & Firebase)

A cross-platform mobile application developed using Flutter and Firebase, designed to provide users with smarter product alternatives based on price, quality, and user preferences. The app integrates real-time database functionality, displays user reviews for similarity comparison, and includes map-based location services to find where alternative products are sold. It also highlights Saudi products to encourage and support local brands.

Paint (Java, GUI Application)

A desktop-based drawing application developed in Java using GUI components, featuring essential computer graphics functionalities. The application supports geometric shape creation, text manipulation, vector-based drawing on X and Y axes, adjustable brush size and color, and an eraser tool for editing, providing a complete interactive drawing experience.

Courses

- HCIA-AI V3.0 Course – Huawei Talent Online (Aug 2023))
- Build Chatbot–Cognitive class.ai , Online(Feb 2024.)
- ChatGPT in Smart Learning–Hamdan Bin Mohammed Smart University, Online(Feb 2024)
- Flutter Workshop – Umm Al-Qura University
- Currently Enrolled: Flutter Development Course – Udemy(May 2025).

Technical Skills

- **Programming Languages:** Java, Python, Dart, JS, C#
- **Web Development:** HTML, CSS, JavaScript
- **UI/UX Design:** Figma, User Experience Principles
- **Version Control:** Git, GitHub
- **Mobile App Development:** Flutter
- **Database Management:** SQL Server, PL/SQL, Firebase

Languages

- English
- Arabic
